About Agile Software Development. Agile Software Development has been creating software for network administration and secure remote access since 2003. We are uncovering better ways of developing software by doing it and helping others do it. These are our values and principles. Agile Software Development is a set of methods and practices where solutions evolve through collaboration between self-organizing, cross-functional teams. Agile software development is an approach to software development under which requirements and solutions evolve through the collaborative effort of self-organizing and cross-functional teams and their customer(s)/end user(s). It advocates adaptive planning, evolutionary development, early delivery, and continual improvement, and it encourages ... - Agile Software Development
