

Download Australian Environmental Planning

Environmental planning is the process of facilitating decision making to carry out land development with the consideration given to the natural environment, social, political, economic and governance factors and provides a holistic framework to achieve sustainable outcomes. The Department designs and implements the Australian Government's policies and programmes to protect and conserve the environment, water and heritage and promote climate action. A review program for State Environmental Planning Policies (SEPPs) to deliver a modern planning system is underway. Environmental Info. How the EPA regulates air and water quality, and control of pollution, waste, noise and radiation. - Australian Environmental Planning
