

Download Economics Of Structural And Technological Change

The idea of convergence in economics (also sometimes known as the catch-up effect) is the hypothesis that poorer economies' per capita incomes will tend to grow at faster rates than richer economies. Economics (/ ? k ? ? n ? m ? k s, i ? k ?-/) is the social science that studies the production, distribution, and consumption of goods and services. Economics focuses on the behaviour and interactions of economic agents and how economies work. Recent Publications. Engel's Law in the Global Economy: Demand-Induced Patterns of Structural Change, Innovation, and Trade (Kiminori Matsuyama, *Econometrica*, March 2019) Daniele Archibugi asks whether the 2007–8 financial and economic crisis was brought about by the exhaustion of the current technological paradigm, and whether a new paradigm will lead to eventual recovery. - Economics Of Structural And Technological Change
