

# Download Ocean “Acidification” Alarmism Reconsidered

Ocean acidification is a phenomenon that has been associated with increased dangers for species of fish, such as leaving them unable to flee from predators and enemies. OCEAN “ACIDIFICATION” ALARMISM IN PERSPECTIVE BY PATRICK MOORE | NOVEMBER 2015. Disclaimer: The opinions expressed in this paper are exclusively those of the independent author(s) and do not reflect the opinions of the Frontier Centre for Public Policy, its Board of Directors, staff and/or donors. ISSN # 1491-78 ©2015 Research conducted by the Frontier Centre for Public Policy is ...Ocean acidification has been dubbed “global warming's evil twin,” thus injecting a degree of morality into the discussion. Even scientists one might expect would be more moderate in their tone employ alarmist language. The concept of ocean acidification is a recent phenomenon that has resulted in an explosion of journal articles, media reports and alarmist publications from environmental organizations. - Ocean “Acidification” Alarmism Reconsidered
