Engineering is almost like a sports career. Nobody can handle a 30-year engineering career. Let's take a look at why engineers should plan for early retirement. Retirement, or the practice of leaving one's job or ceasing to work after reaching a certain age, has been around since around the 18th century. I tripped over a couple of statistics the other day that made me rethink the plight of the average American retiree. First, the average couple on Social Security gets over \$28,000 per year. Even if you love your job, it's hard not to fantasize about an early retirement. But the reality is that many Americans will end up having to work past the traditional retirement age of 65 due to a number of factors, including longer life expectancy, stagnant wages and a lack of jobs that offer a pension plan to guarantee income in retirement. - Retired At 35 A Plan For Early Retirement
