CRAFT is about software craftsmanship, which tools, methods, practices should be part of the toolbox of a modern developer and company, and it is a compass on new technologies, trends. You can learn from the best speakers and practitioners in our community. In modern IT services delivery, bespoke systems and multitudes of point-solution products are rapidly being replaced with large-scale enterprise cloud services from providers like Amazon, Microsoft, ServiceNow, Salesforce, and others. Introduction. DevConf is a community-driven, developer focused, one-day conference hosted annually. The aim of the conference is to provide software developers with a buffet of tools, practices and principles applicable to tackling current and future challenges in the South African software development environment. There's a story to tell, about musicians, artists, philosophers, scientists, and then programmers. There's a truth inside it that leads to a new view of work, that sees beauty in the painful complexity that is software development. - Test-Driven Database Development
