

Download Economics An Alternative Text

Economics (/ ˈk ɒ n ɒ m ɪ k s, i ˈk -/) is the social science that studies the production, distribution, and consumption of goods and services.. Economics focuses on the behaviour and interactions of economic agents and how economies work. Microeconomics analyzes basic elements in the economy, including individual agents and markets, their interactions, and the outcomes of interactions. An experiment measures how much Indian cycle-rickshaw drivers actually wanted to remain sober on the job. Research Highlight Reassessing public health campaigns Ecological economics (also called eco-economics, ecolonomy or bioeconomics of Georgescu-Roegen) is both a transdisciplinary and an interdisciplinary field of academic research addressing the interdependence and coevolution of human economies and natural ecosystems, both intertemporally and spatially. By treating the economy as a subsystem of Earth's larger ecosystem, and by emphasizing the ...Read the latest articles of Ecological Economics at ScienceDirect.com, Elsevier's leading platform of peer-reviewed scholarly literature - Economics An Alternative Text
