Heart rate variability (HRV) is the physiological phenomenon of variation in the time interval between heartbeats. It is measured by the variation in the beat-to-beat interval. Other terms used include: "cycle length variability", "RR variability" (where R is a point corresponding to the peak of the QRS complex of the ECG wave; and RR is the interval between successive Rs), and "heart period ... What is Heart Rate Variability (HRV) Biofeedback? Heart Rate Variability (HRV) biofeedback is a relatively new technique for training people to change the variability and dominant rhythms of their heart activity. ©2011 SweetWater Health, LLC • All rights reserved 2 What is Heart Rate Variability?
