History. Chlorophyll was first isolated and named by Joseph Bienaimé Caventou and Pierre Joseph Pelletier in 1817. The presence of magnesium in chlorophyll was discovered in 1906, and was the first time that magnesium had been detected in living tissue. I moved to San Francisco 9 months ago from the East Coast bastion of Boston. Despite having experience living in a major US city, I found quite a few surprises coming here. Some have been great, while others not so much. If you're planning the move here, I hope this will help you know better... This banner text can have markup.
