

# Download New Technologies In Urology New Techniques In Surgery Series

State-of-the-art urology is inconceivable without the diagnostic and therapeutic techniques of modern endoscopy. Cystoscopy, transurethral resection of the prostate (TUR), and ureterorenoscopy have become routine procedures and are continuously being improved by new technologies. Dr Raji Kooner offers the most comprehensive advice and professional prostate cancer surgery options in Australia. Specialist in Robotic Prostate Surgery with over 1300 procedures. Important information regarding your access to The Journal of Urology® and Urology Practice: . Starting with the January 2019 issue of The Journal of Urology® and Urology Practice, the journals will be published by Wolters Kluwer.. The site is currently in development. The login process for AUA Members will remain the same. Laparoscopy (from Ancient Greek ?????? (lapara), meaning 'flank, side', and ?????? (skopeo), meaning 'to see') invented by George Kelling in 1901, in Germany, is an operation performed in the abdomen or pelvis using small incisions (usually 0.5–1.5 cm) with the aid of a camera. The laparoscope aids diagnosis or therapeutic interventions with a few small cuts in the abdomen. -
