Macho, Phillip V. Tobias, Timothy C. Partridge and Alun R. Hughes Introduction In February–March 1987, excavation of in situ material in Partial skeletons of ancient hominins are extremely rare. Sexual dimorphism is the condition where the two sexes of the same species exhibit different characteristics beyond the differences in their sexual organs. The condition occurs in many animals and some plants. Differences may include secondary sex characteristics, size, weight, color, markings, and may also include behavioral and cognitive differences. - Osteology Cunningham Manual Of Anatomy
