A random walk is a mathematical object, known as a stochastic or random process, that describes a path that consists of a succession of random steps on some mathematical space such as the integers. Field fluctuations. A quantum fluctuation is the temporary appearance of energetic particles out of empty space, as allowed by the uncertainty principle. His face, under the influence of this fluctuation of color, changed exceedingly, and improved in proportion as it changed. Random Number Generator (RNG) A random number generator is a system used to generate a set of numbers that cannot be reasonably predicted better than by random chance. - Random Fluctuations
